

CORRECTIONS & CLARIFICATIONS

This page has been created to inform the website users to corrections and clarifications to information contained within this site. Even with the best proof reading and editing some errors or confusing information slips through. We welcome feedback from you our users. If you find errors or if information is confusing; please contact us directly at (401) 419-3890 or e-mail lylermrlhyd@aol.com.

Correction: In the sections concerning food grade fluid there is information that mislabels the glycol base as poly propylene of PPG. In fact, this is incorrect and should be propylene or PG. Poly propylene cannot be used as a base in food grade fluid. Editorial actions will be taken to correct this error.
